

# Online Inventory Management

Your fulfillment services starts when your products are at our docks:

- your products are unloaded at a temperature controlled dock and inspected for damage,
- your products are hand-counted - and scanned if bar coding is available - and entered into our inventory management system,
- depending on the size of your inventory on hand, all or part of your products are organized in one of our pick-and-pack storage rooms at the appropriate temperature. The cold chain is never broken, we guarantee it! \*
- we send you via e-mail (or fax upon request) an updated inventory report.
- the inventory is available for you to view in the Client Portal the same day. Our system offers our clients 24/7 access to all inventory information.

\*yes, that's right, frozen products are individually hand picked inside a sub-zero freezer room and then quickly packed with dry ice in a refrigerated packing room. Our staff is very, very resilient...

## Freight and Distribution

Frozen Fulfillment can also arrange and organize all of your shipping needs through our Freight and distribution partner. Just ask us for details. You can't be more centrally located than we are and with more than 130 truck line deservng our location, chances are pretty good that we can provide very competitive prices there as well...
